

cv5400 Specifications

Capacity:	60GPM
Vacuum:	29 inch Hg
Pressure:	175 PSI
Discharge Head:	350 Feet Vertical
Suction Lift:	29 Feet Vertical
Power Required:	5 HP
Dimension:	34"L x 24"W x 46"H
Weight:	425 lbs

Patented Technology Inside Every Pump

The SaniSailor Masterline CV5400 Central Vacuum Systems are rugged systems designed to be the vacuum source for multiple pumpout locations. These systems generate very high vacuum and are designed to be used frequently. The SaniSailor Masterline systems are used with SaniSailor Stanchions and hydrants. It automatically regulates the pumpout locations and turns the pump on and off as needed, in response to a hydrant or stanchion being accessed.

The SaniSailor Masterline CV5400 Central Vacuum System is a workhorse unit which will deliver 28" of vacuum to many hydrants or stanchions. This system is designed for applications requiring: 1) hydrants at individual slips, and 2) stanchions at common locations, within the same general area.

- **47% -120% longer hose life compared to other brands**
