Power Required:	5HP
Dimensions:	34" L x 24" W x 46" H
Weight:	425 lbs

Patented Technology Inside Every Pump

The SaniSailor Sentinel EV305 is designed to be used as a high vacuum, high discharge pumpout system. The Sentinel EV305 is more than a lift station. With the capability of high vacuum and high lift at high flow rates, the SaniSailor EV305 eliminates the need for a separate lift station.

The Sentinel EV305 can be used as a vacuum system or as a dockside pump station. The Sentinel EV305 develops an absolute vacuum which enables it to pump out boats located hundreds of feet from the pump-out system.

The SaniSailor Sentinel EV305 includes our **exclusive** vacuum assisted **peristaltic pump**.

- 12%-120% longer hose life than compared to other brands
